Students Give 140 Blood Pints

El Camino College Warriors contributed 140 pints of blood last Thursday as the Red Cross bloodmobile established temporary headquarters on campus. Mrs. Ruth Mazak was faculty chairman of the drive.

A total of 149 donors volunteered to give blood, with nine being rejected. Mrs. Mazak said. Of the donors, 82 contributed blood for the first time.

Campus organizations, in competition for a perpetual trophy given to the club whose members contribute the most blood on a percentage basis, accounted for almost 100 pints. Faculty members and employees of the college contributed 16 pints, while 33 students with no club affiliation served as donors.

Winning the trophy for the semester was Lambda Delta Sigma, a special interest group, with 70 points. Points and pints of blood do not coincide in the method of scoring utilized.

Runners-up were the Phi Theta Chi sorority and the Phi Sigma Upsilon fraternity. Also placing high on the list were the Theta Orpheans, Xi Iota Chi, the International Relations Club and Delta Sigma Chi.

Clubs also assisted in registration and other phases of work pertaining to the activity.

Two graduates of El Camino college have received top honors from the University of California at Los Angeles, according to a letter addressed to W. Holmes Smith, assistant director of student personnel at El Camino.

Raymond Hagerty, of Hawthorne, and Carl Leo Bose, of Torrance, were the recipients of the UCLA distinctions.

In notifying the college of the students' performance, C. Martin Duke wrote, "I am pleased to send you a copy of the Engineering Honors Assembly program at which Raymond Hagerty was given the Junior College transfer award, as the junior college transfer at the junior level who made the highest academic record during his first semester at the university."

"In second place, and ranking very close behind Hagerty, was Carl Leo Bose, also a transfer from El Camino college. We are deeply pleased with the performance of these men, and happy that they elected to transfer to this college of engineering."
